Architecture and Engineering

Experience the synergy of our in-house architecture and engineering expertise tailored specifically for healthcare. Our approach combines innovative design solutions to create cutting-edge healthcare environments. Our multidisciplinary team collaborates seamlessly to deliver spaces that prioritize functionality, efficiency, and patient comfort. From state-of-the-art technology to compliant infrastructure design, we understand the unique requirements and regulations of the healthcare industry. With a focus on user-centric design and sustainable practices, Imagine Unlimited ensures that every project exceeds expectations and contributes to the advancement of healthcare facilities. Allow us to transform your medical space into a beacon of innovation and excellence.

Transforming medical spaces into state-of-the-art facilities is our expertise at Imagine Unlimited. With a proven track record modernizing healthcare environments, we understand the unique requirements and regulations that come with these projects. From updating outdated infrastructure to implementing cutting-edge technology, our team of experienced professionals ensures that every aspect of the process is meticulously planned and executed. We pride ourselves on delivering innovative solutions tailored to meet the specific needs of each client. Allow our team to elevate your healthcare space to new heights of functionality, efficiency, and aesthetic appeal.

Construction

U | SUPPORT + **On-site Specialist**

Introducing Support +, our innovative On-site Specialist program is designed to serve and ensure the seamless functionality of your operating room. With Support +, you have access to a devoted team of extensively trained specialists dedicated to enhancing the efficiency and effectiveness of your operational processes. Encompassing equipment setup, troubleshooting, and maintaining sterile conditions while supporting OR personnel, our On-site Specialists are there every step of the way, allowing the surgical team to focus entirely on patient care. With their expertise and proactive approach, Support + ensures smooth operations, minimizes downtime, and enhances overall patient outcomes. Allow Support + to be your reliable partner in surgical excellence.

Maintain peak performance and reliability in your Operating Room.

Imagine Surgical Booms and Lights

Introducing the **Imagine One** surgical light, revolutionizing operating room illumination with its patented reflector technology and unbeaten shadow resolution. The **Imagine One**, boasting a unique Triangle Design, offers the slimmest profile on the market, ensuring maximum maneuverability and precise positioning during surgeries. Its antibacterial coating ensures a hygienic environment, while light and handling control options, including cardanic control, sterile handle, or wall control panel, empower surgical teams with flexibility and ease of use. Experience superior visibility, energy efficiency, and cost savings with the Imagine One surgical light.

Complementing the **Imagine One** surgical light, the Imagine Surgical Booms elevate operating room efficiency and hygiene standards to new heights. With easy cleaning features and a durable design, the Imagine booms boast enclosed housing, making maintenance a breeze. Their adept maneuverability effortlessly handles up to 2205 lbs without articulation and 550 lbs when motorized or articulating, providing unparalleled flexibility during surgical procedures. Dimmable lighting options aid operator orientation, while flexible arm lengths allow for a range of up to almost 9 ft, ensuring optimal positioning. Elevate your surgical setup with Imagine Surgical Booms for unmatched performance and reliability.

Revolutionary 3D Software

Experience the future of healthcare design with our cutting-edge 3D Software. Seamlessly transform your vision into reality as you build and visualize your medical space in real time. With intuitive tools and stunningly realistic graphics, our software empowers architects, designers, and medical professionals to collaborate effortlessly, ensuring every detail is meticulously crafted for optimal functionality and efficiency. From layout planning to equipment placement, our 3D software offers unparalleled precision and flexibility, revolutionizing the way clinical environments are designed. Elevate your projects to new heights and stay ahead of the curve with our innovative resolutions.
