Illumination Ingenuity

- **Active Shadow Management:** Minimize shadows, enhance visibility and clarity in the operating field to support precision during the procedure.
- **Patented Reflector Technology:** Ensures excellent light quality and consistent performance across the light field.
- **Precision Positioning:** Ensure near gap-free coverage over the operating field with unique triangular design.
- **Patented Reflector Technology:** Ensures excellent light quality and consistent performance across the light field.
- **Antibacterial Coating:** Reduce germs by 99.99%, maintaining a sterile environment.

IMAGINE	U ONE
Central Illumination	160,000 lx
Color Temperature	4,500 K
Light Field Diameter	180-300 mm
Color Rendering Index	96 CRI
Light Head Power Consumption	53 W
LED Lifetime	>60,000 hrs

Radiant Revolution

- **High Resolution Camera Systems:** Streamlined camera preparation for 4K and HD systems, ensuring future-proof capabilities.
- **Consistent Color Rendering:** Maintains high-quality color rendering across different color temperatures for accurate representation
- **Low Heat Dissipation:** Designed with an aluminum reflector and housing to ensure excellent cooling and minimize heat output.
- **Extended Lifespan:** A truly reliable partner for the future with an LED lifetime > 60,000 hrs.
- **Comprehensive Warranty:** Elevate your customer experience with Imagine Unlimited's unparalleled Support + program.
